

## Endeavor Hall Containing Potential Outbreaks Assurance

*Following guidance found in the [COVID-19 School Manual](#), the following protocols and information have been added to the 2020-21 Re-Opening Plan.*

### **Single Cases:**

As state in the [Endeavor Hall Re-Opening Plan](#), if 1 student in a classroom tests positive, the student and school will follow procedures/protocols found on page 6-7 of the reopening plan.

### **Classroom Outbreaks:**

If 2 or more students, or 1 teacher and 1 student from the same classroom test positive within a 14-day period, then this is considered an outbreak. Per state guidelines and recommendations, the students and teacher from the class will be required to quarantine for 14 days and show no symptoms before returning to in-person instruction. During this period, instruction will move to online following our virtual learning schedule with access to asynchronous lessons available.

### **School Outbreaks:**

If 15 people test positive for COVID-19 across the school (more than one classroom) in a 14-day period, then the entire school will close and move to online instruction following our virtual learning schedules for 14 days. The individuals who tested positive should be fever free for 24 hours before returning when school resumes in-school instruction.

*Communication regarding classroom or school closures will come from the principal.*

*Should an individual, class, or school move to a closure, chromebooks will be available to check out for online/virtual learning.*
